Weed Management In The Humid And Sub-Humid Tropics

Synopsis

The abundant weed growth in the humid and sub-humid tropics is one of the most serious constraints in producing crops, establishing pastures and maintaining water resources. This book presents historic and recent data on the biology of weeds and their control, within the general context of the husbandry of crops and the management of pastures and aquatic situations. The first seven chapters cover the nature of negative values of weeds, principles of weed ecology, weed control and establishment of farming and cropping systems in tropical regions, performance of crops in the tropical ecosystems, main weeds in the forest regions, and main weeds in the savannah regions. Chapter 8 deals with weed control methods in general and chapters 9 to 14 with weed control in various crops. Chapter 15 covers weeds and their control in pastures, and chapter 16 aquatic weed management.

Book Information

Paperback: 246 pages

Publisher: KIT Publishers (January 1, 2001)

Language: English

ISBN-10: 9068321234

ISBN-13: 978-9068321234

Product Dimensions: 0.8 x 6.8 x 9.2 inches
