Sharks, Rays, And Chimaeras Of California (California Natural History Guides)

Synopsis

This guide is the only complete reference to the sharks, rays, and chimaeras found in California's waters; from the intertidal zone to 500 miles offshore. Species accounts give information on habitat and range, natural history, interactions with humans, nomenclature, and further references. 68 beautiful color illustrations show each shark, ray, and chimaera; accompanying line drawings highlight differences in teeth, underside of the head, and egg cases. Includes information on the California marine environment, ecology and conservation, and shark biology.

Customer Reviews

This guide contains a vast array of sharks, rays and chimaeras that reside along the California coast, as well as those that migrate through California waters. It is a comprehensive guide that details specific information about each shark, including identification, habitat, life cycle, prey items, human interactions, etc. I highly recommend this book to anybody interested in learning more about sharks and rays.
