Check Out What Others Are Saying...About This Book"With rising fuel prices, who wouldn't want to have more options when it comes to fueling our vehicles? This book takes a quick look into what bio-diesel is, how to construct your own refinery, and how to find sources of bio-diesel. This is a great fuel option for those that are environmentally conscientious or just want to stop getting robbed at the pump. This has some great lessons in it for the budding science student on just how this technology works. The book also details some of the few drawbacks, like the lingering smell of fried food and the initial startup costs. Overall, it is easy to follow and understand with great step-by-step instructions." Liz Evans

"This book gives an overview of biodiesel. It examines and compares the ways in which we can use vegetable oil and ethanol. It's quite technical and the book does go into some chemistry but it wasn't at all hard to follow. It's well-researched and gives quite a wide overview as it also discusses the problem in Hong Kong, and it helps to open your eyes, and there are links included for further research." Robert Sparks

There is not a shadow of a doubt that humanity is desperately in need of economically viable, alternative fuel sources, as eventually the supply of fossil fuels is going to run out (albeit 80 or 90 years from now). And when it does, we are going to need some inexpensive environmentally friendly fuel source alternatives to power vehicles run household appliances and heat homes and a hot water so that humanity can keep on enjoying the lifestyle it has become accustomed to. With this handy 31 page volume by Amir Patel, you will learn everything from what bio diesel is, to where to procure all of the supplies necessary to construct your own backyard bio diesel refinery and different sourcing possibilities for the very crucial element of bio diesel vegetable oil. The pages of this book will cover all of this and many more interesting tips and tricks you must know to effectively start your bio diesel processing plant and save thousands of dollars a year on fuel. Not to mention, you will be taking a discarded element such as french fry grease and recycling it into something useful, such as fuel for your truck or my more not to mention your kids will absolutely love writing with you because your vehicle will smell like french fries!! Due to the fact that you are burning will find vegetable oil products, and fact in your vehicle's fuel tank rather than decomposing dinosaurs, bio diesel is much better for the environment as it admits no harmful gases of any kind. And although the initial startup of your backyard bio diesel plant may be somewhat expensive, once it is up and operational at full capacity. You will be getting gallons of fuel for just pennies on the dollar!
