My son started using the textbook (which is not that great) for his junior year. The trouble was that the teacher kept assigned even problems and my son didn't know if he was doing the problems right. The teacher doesn't give out the answers in class either. This book solved our problems. Worth every penny!

This is a very useful book, especially for home schooling. Explanations are good and understandable. I would strongly recommend it.

It's very helpful to have a solution key when using the associated textbooks for self-study. This one has all the answers for a very good textbook.
