Taildragger Tales: My Late-Blooming Romance With A Piper Cub And Her Younger Sisters

Synopsis

Daniel Ford learned to fly at the age when most men are well into retirement. In this short book, he tells how it was to have a flight instructor one-third his age, to make a sentimental journey to the Pennsylvania airport where the Piper Cub first saw the light of day, to practice spins and aerobatic turns in a Great Lakes biplane, to make a leisurely tour around Lake Winnepesaukee and into his past, and to have a close encounter with the National Defense Emergency of September 11, 2001. A delightful story for anyone who ever dreamed of becoming a pilot.

Book Information

Audible Audio Edition

Listening Length: 1 hour and 3 minutes

Program Type: Audiobook

Version: Unabridged

Customer Reviews

As a 66 yr old, licensed pilot who has not flown for 6 or 7 years I had been contemplating a return to the sky. Reading Mr Ford's account of flying, in the very type of plane I had always wanted to own and fly, has motivated me to get serious about it and stop the procrastinating. To night (Christmas eve 2013) I called my old flight instructor for recommendations on where I might find a Cub and an instructor. Maybe, with a little luck, by spring I'll be back in the sky

Nice reading about the gentle world of recreational flight. The pilot sets an excellent example, learning in a tail wheel aircraft, learning aerobatics and practicing bush pilot techniques. While Mr. Ford started flying at the age of 66 he takes it seriously and has gone about it the right way, developing skills and building competency. I wish that every pilot would take it as seriously as does the author.

This is a collection of essays in which the author tells about getting a pilot's license at age 66 so he could fly low and slow in a 60 year old Piper J-3 Cub. If you are interested in airplanes and flying, this is good vicarious entertainment.

Delightful account of the simple joy of living
In this context it tells about just flying around in a slow airplane, without going anywhere special, or battling the weather, or magnificent surroundings. It is as best living is just to live and enjoy it everyday

I did not realize this was basically a collection of a few essays, and not really a full-length book. Probably my fault for not reading the reviews carefully enough. Overall, it's reasonably well written, just not very inspiring. After reading several "rave" reviews, I was expecting a lot more, so I guess I was just left with a feeling of disappointment. It was a decent read, for the 30 minutes it took me to read it...

I admire Mr. Ford for learning to fly in the late years of his life! I am encouraged that I have a few years left in me as well. I loved this book, it was short, but, to the point! It is an encouraging, often humorous read, I will come back to it and read it again!

As an experienced GA pilot with a couple hundred hours in a classic J-3 Cub, I found myself re-living early years at my home grass strip flying a cub. There is no aircraft with the hands on feel of a cub, and Taildragger Tales brought the experience back to life. Recommended reading for any pilot that has ever flown a classic.

I enjoyed reading the book but I think I expected a bit more adventurous tales. Well done, however, to Dan Ford for achieving what he has in the later stages of his life. It is certainly encouraging to see that it is never too late to learn to fly and I found his stories inspirational. A nice simple, quick read!
